**Business Analysis, Software Testing,
User Experience, Project Management**
training, coaching & workshops

Our Training

Our training suite is focused on software quality assurance which is our core expertise. We continuously enhance our training offer based on the experience acquired during our clients' assignments in order to remain relevant to the market needs and ultimately to you.

Our approach is based on a deep analysis and mutual understanding of your short to long term needs objectives in order to define the most suitable training plan.

We delivered our Training in **open sessions** in Luxembourg or we come to you through a **dedicated in-house session** at your company's premises.

Certifications

Globally **recognized certification** courses (ISTQB, IREB, IQBBA,...)

Tailored Training

Catalogue or **custom training** adapted to your needs and delivered by test professionals.

Did you know? The legislation on continuing vocational training enables companies that are legally established in Luxembourg to benefit from financial assistance for their training plans.
